

SHOWRI KONDA

FULL STACK DEVELOPER | JAVA | PYTHON | ANGULAR | AWS

484-645-0952 | kondas0728@gmail.com

PROFESSIONAL SUMMARY

Full Stack Developer with 7+ years of experience designing, developing, testing, deploying, and supporting scalable enterprise applications using Python, Java, JavaScript, and cloud technologies. Strong expertise in FastAPI, Spring Boot, Spring MVC, Hibernate, React, Angular, RESTful APIs, SOAP services, SQL, and microservices architecture. Experienced in building PTZ camera applications, enterprise Java systems, cloud-native services, secure integrations, and automated deployment pipelines using AWS, Docker, Jenkins, and GitHub Actions.

- Developed full-stack applications using **Python, Java, FastAPI, Spring Boot, Spring MVC, Hibernate, React, and Angular**.
- Developed **Retrieval-Augmented Generation (RAG)** chatbots using **Python, LangChain, AWS Bedrock, and OpenAI embeddings** to answer user questions from enterprise documents.
- Built document-ingestion pipelines for text extraction, preprocessing, chunking, embedding generation, and vector indexing in **Amazon OpenSearch Serverless**.
- Implemented semantic vector search and prompt engineering to retrieve relevant document context and generate accurate, grounded chatbot responses.
- Built backend services and automated utilities using **Requests, HTTPX, asyncio, OpenCV, NumPy, and JSON processing**.
- Developed enterprise presentation and data-access layers using **JSP, Spring Tag Libraries, Tiles, JavaScript, AJAX, Spring ORM, Hibernate, DB2, and PL/SQL**.
- Designed **RESTful and SOAP web services** using **FastAPI, Spring Framework, Apache Axis, WSDL, Node.js, and Express.js**.
- Deployed cloud-based applications and automated workflows using **AWS EC2, S3, Lambda, API Gateway, Step Functions, IAM, CloudWatch, Docker, GitHub Actions, and Jenkins**.
- Secured application integrations using **JWT/Bearer Authentication, OAuth 2.0, Okta, Spring Security, HTTPS, and SSO**.
- Engineered asynchronous integrations using **WebSockets, TCP, UDP, Multicast, JMS, Kafka, RabbitMQ and Node.js**.
- Designed database solutions using **Oracle, Redis, SQL Server, MySQL, DB2, PostgreSQL, MongoDB, DynamoDB, and SQL**.
- Created automated tests using **PyTest, unittest, Requests, JUnit, Mockito, Cucumber, Postman, ReadyAPI, and SoapUI**.
- Supported Agile SDLC, CI/CD automation, AWS monitoring, application logging, production troubleshooting, and root-cause analysis using **Jira, CloudWatch, Splunk, Log4j, GitHub, Maven, Ant, and Jenkins**.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, TypeScript, SQL, PL/SQL, Rust, C++

Frameworks: FastAPI, Spring Boot, Spring MVC, Spring Security, Hibernate, Angular, AngularJS, React, Node.js, Express.js, Axum

APIs & Integration: REST, SOAP, OpenAPI/Swagger, WebSockets, OAuth 2.0, JWT/Bearer Authentication, TCP/IP, UDP, Multicast, Kafka, JMS

AWS & DevOps: EC2, S3, Lambda, API Gateway, CloudWatch, IAM, Step Functions, Docker, Terraform, Jenkins, GitHub Actions, Gradle

Data: PostgreSQL, MySQL, SQL Server, Oracle, DB2, MongoDB, DynamoDB, Redis, SQLAlchemy, SSIS, Dell Boomi

Testing & Delivery: PyTest, unittest, JUnit, Mockito, Cucumber, Selenium, Postman, SoapUI, JMeter, Splunk, Git, Jira, Agile/Scrum

AI & Generative AI: Retrieval-Augmented Generation (RAG), LangChain, AWS Bedrock, OpenAI API, OpenAI Embeddings, Amazon OpenSearch Serverless, Document Chunking, Vector Embeddings, Semantic Search, Vector Search, Prompt Engineering, Context Retrieval

PROFESSIONAL EXPERIENCE

Haverford Systems Inc.

Full Stack Developer

Downingtown, PA

Feb 2025 - Present

- Design and deliver full-stack applications for PTZ camera platforms using **Python, FastAPI, JavaScript, React, Node.js, REST APIs, WebSockets, and AWS cloud services**.
- Developed a **Retrieval-Augmented Generation (RAG)** chatbot using **Python** and **LangChain** to orchestrate document ingestion, retrieval, prompt construction, and response generation.
- Built a document-processing pipeline that extracts and preprocesses text, divides large documents into searchable chunks, and generates vector representations using **OpenAI embeddings**.
- Indexed document embeddings in **Amazon OpenSearch Serverless** and implemented semantic vector search to retrieve document content relevant to each user question.
- Used **AWS Bedrock** and prompt engineering to combine retrieved document context with user queries and generate accurate, context-grounded chatbot responses.
- Build responsive customer-facing interfaces for device configuration, live monitoring, camera control, and preset management across desktop and mobile devices.

- Develop Python backend services and automation utilities using **FastAPI, Requests, HTTPX, asyncio, and JSON processing** to manage camera configurations, validate API responses, and monitor device connectivity.
- Re-architected a legacy browser-based integration into a **Python and Node.js** service architecture, improving system reliability by 35% and simplifying maintenance, testing, and future development.
- Develop secure server-side services using **FastAPI, JWT/Bearer authentication, and proxy-based routing**, reducing client-side complexity by 40% while improving scalability and data protection.
- Build image-processing utilities using **OpenCV, NumPy, and Pillow** to process camera snapshots, validate video frames, and support image-based diagnostics.
- Engineer real-time workflows that ingest **TCP, UDP, and multicast signals**, apply Python-based decision logic, and trigger automated camera-tracking, device, and user-interface actions.
- Create automated API and integration tests using **PyTest, unittest**, and Requests to validate backend functionality, identify device-communication issues, and reduce regression defects.
- Implement **GitHub Actions** CI/CD pipelines to build, test, package, and deploy multi-platform releases to **Amazon S3**, reducing manual release effort by 60%.
- Design and deploy scalable services using **AWS EC2, Lambda, API Gateway, FastAPI, Python, and Node.js** across development, testing, and production environments.
- Configure **Amazon CloudWatch dashboards**, logs, metrics, and alerts to monitor application performance, API failures, deployment health, and camera connectivity.
- Manage camera snapshots, configuration backups, firmware packages, and application releases in **Amazon S3** using access controls and versioning.
- Collaborate with product, QA, and engineering teams through **Agile sprints, code reviews, debugging sessions**, and release planning to deliver reliable features on schedule.

Technology: Python, FastAPI, Requests, HTTPX, asyncio, LangChain, Retrieval-Augmented Generation (RAG), OpenAI API, OpenAI Embeddings, AWS Bedrock, Amazon OpenSearch Serverless, Document Chunking, Vector Search, Semantic Search, Prompt Engineering, OpenCV, NumPy, Pillow, JavaScript, React, Node.js, REST APIs, WebSockets, TCP/IP, UDP, Multicast, JWT/Bearer Authentication, Swagger/OpenAPI, AWS EC2, AWS Lambda, Amazon API Gateway, Amazon S3, Amazon CloudWatch, IAM, GitHub Actions, Git, CI/CD, Agile, Jira.

West Chester University of Pennsylvania Software Developer

West Chester, PA
Mar 2023 - Dec 2024

- Contributed throughout the Agile SDLC, including requirements analysis, solution design, development, testing, deployment, documentation, and production support.
- Implemented **Spring-based REST APIs** and validated request handling, security controls, and JSON responses using Postman.
- Integrated third-party REST services with **OAuth, HTTPS, and single sign-on** requirements across connected applications.
- Developed **Angular, AngularJS, HTML5, CSS3, and JavaScript** interfaces and consumed **Node.js and Express.js** services from reusable frontend components.
- Created unit and behavior-driven tests using **JUnit, Mockito** feature files to improve validation and regression coverage.
- Supported migration from Siebel to **Microsoft Dynamics CRM** by developing grids, ribbons, tables, views, and data-driven interface components.
- Designed **SSIS and Dell Boomi** migration and synchronization processes to move **DB2** data into cloud-based **CRM systems** and support daily enterprise integrations.
- Improved operational support through Splunk dashboards and alerts, while using **Maven and Jenkins** for builds, Bamboo for deployments, and Jira and Confluence for delivery coordination.

Technology: Java 8, Spring Framework, REST, SOAP, Angular, AngularJS, Node.js, Express.js, Dynamics CRM, Dell Boomi, SSIS, DB2, AWS S3, Splunk, JUnit, Mockito, Cucumber, Postman, Maven, Jenkins, Bamboo

Tata Consultancy Services Java Developer

Remote
Jun 2020 - Dec 2022

- Developed enterprise contract-management, usage-tracking, billing, and reporting applications using **Java, Spring Boot, Angular, TypeScript, and microservices architecture**.
- Built responsive single-page applications using **Angular, TypeScript, HTML5, CSS3, Bootstrap, and Angular Material** to support contract, invoice, pricing, and customer-account workflows.
- Created reusable Angular components, services, directives, pipes, and shared modules to maintain consistent functionality and reduce duplicated frontend code.
- Used **RxJS Observables** and operators to manage asynchronous API calls, application events, error handling, and communication between Angular components.

- Implemented centralized application state management using **NgRx Store, Actions, Reducers, Effects, and Selectors** for complex contract and billing workflows.
- Developed dynamic forms using **Angular Reactive Forms**, custom validators, FormBuilder, and validation messages to improve data quality and user experience.
- Configured **Angular Router, lazy-loaded modules, route guards**, and role-based navigation to improve application performance and secure protected pages.
- Integrated Angular applications with **Spring Boot REST APIs using HttpClient, HTTP interceptors, JSON payloads**, and centralized exception handling.
- Implemented JWT-based authentication and authorization using **Angular route guards, HTTP interceptors, and Spring Security** to secure frontend routes and backend services.
- Developed scalable backend microservices using **Java, Spring Boot, Spring MVC, Spring Data JPA, and Hibernate** for contracts, invoices, usage records, and billing operations.
- Designed reusable REST APIs for bulk contract and billing updates, **reducing turnaround time for high-volume operations by approximately 34%.**
- Implemented business rules for prepaid usage tracking, balance calculations, pricing configurations, billing validation, and transactional data consistency.
- Optimized **Hibernate queries, database indexes, stored procedures, and SQL integrations across MySQL and SQL Server**, improving large-volume **data-retrieval performance by approximately 29%.**
- Implemented event-driven communication using **Apache Kafka** to support asynchronous processing and loosely coupled **microservices.**
- Created frontend unit tests using Jasmine and Karma and backend tests using **JUnit and Mockito** to validate Angular components, Java services, controllers, and repository layers.
- Used **Swagger/OpenAPI and Postman** to document, test, and validate REST endpoints and frontend-backend integrations.
- Containerized application services using Docker and supported automated build, testing, and deployment workflows using **Maven, Jenkins, GitHub Actions, and AWS.**

Technology: Java, Spring Boot, Spring MVC, Spring Data JPA, Spring Security, Hibernate, Microservices, Angular, TypeScript, RxJS, NgRx, Angular Material, Bootstrap, Reactive Forms, Angular Router, Route Guards, HTTP Interceptors, REST APIs, JSON, JWT, OAuth 2.0, Kafka, MySQL, SQL Server, JUnit, Mockito, Jasmine, Karma, Swagger/OpenAPI, Postman, Maven, Docker, Jenkins, GitHub Actions, AWS, Git, Jira, Agile/Scrum.

Sravani Rao Label

Web Developer

Remote

May 2019 - May 2020

- Partnered with management to gather website requirements, establish content priorities, and translate business needs into functional website enhancements.
- Developed and tested responsive web pages using **HTML5, CSS3, JavaScript, AJAX, jQuery, and JSP.** Integrated graphics, audio, and video assets while maintaining responsive design, consistent presentation, and cross-device usability.
- Managed daily website content updates and coordinated with business stakeholders to deliver requested enhancements within established timelines.
- Created and maintained **technical documentation, administration procedures**, and plans to support service restoration.
- Monitored website traffic, availability, and performance to identify usage trends, technical issues.
- Used **Power Query** to clean and transform operational data from **Excel and CSV files** for reporting in **Power BI.**
- Developed **Power BI dashboards using DAX measures, KPI cards, charts, filters**, and slicers to help management analyze website traffic, content engagement, and performance trends.

Technology: Java, JSP, Power BI, Power Query, DAX, Data Modeling, Microsoft Excel, CSV, HTML5, CSS3, JavaScript, AJAX, jQuery Responsive Web Design, Multimedia Integration, Website Content Management, Performance Monitoring, Technical Documentation.

EDUCATION

Master of Science, Computer Science

West Chester University
